

Appendix A: Construction impacts and resources

Tree removals

During a project's design, staff from the City of London's engineering, forestry, and construction administration divisions, along with the project engineer and arborist, walk the site to determine the current health of the trees, and determine how to best install infrastructure while minimizing impacts to trees and structures.

After careful assessment, it was determined that there are no trees within the City right-of-way that need to be removed for health reasons or due to construction conflicts

Dust, noise and vibrations

You may experience dust, noise, service interruptions and other inconveniences during construction. Construction equipment can also cause vibrations, so please ensure you protect any valuables susceptible to damage.

Work hours

Work will typically take place from 7:00 a.m. to 7:00 p.m., Monday to Friday. If needed, some after-hours work may be required to accommodate the completion of the project within the established schedule and to minimize impacts of construction. The project team will notify residents, businesses and property owners ahead of any overnight, after-hours or weekend work.
