HELPING YOU MAKE GREENER CHOICES

SEPTEMBER/OCTOBER 2022

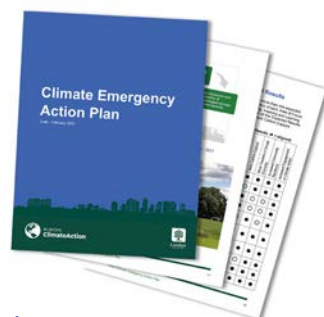

We need to take action together to mitigate and adapt to climate change

London's new **Climate Emergency Action Plan** is an important response to our climate emergency.

Over the course of the plan's development, Londoners participated by calculating their household carbon footprint, using a Climate Action Plan Simulator to create a plan important to them, participated in online sessions and activities, and submitted their ideas, goals, and comments with the City.

Communities and organizations including businesses, developers, students and schools were also engaged for their perspectives.

London's response to climate change is an ongoing conversation. Continue taking action and review the Climate Emergency Action Plan at london.ca/climate

Watch for further updates in fall and winter 2022/2023

Send us your ideas on other topics you would like to see in CityGreen by emailing suggestions to: ecotips@london.ca

Look for your new Waste Reduction & Conservation Calendar in the mail this **September!**

Inside, you'll find information about:

- Garbage and recycling and yard waste collection
- EnviroDepots
- Climate change and how the City is responding
- Composters and digesters
- Reducing food waste, and more!

There will be no collection on National Day of Truth and Reconciliation on **September 30, 2022**. Please review the updated schedule in your new calendar or visit

Curbside collection of toilets has changed

To ensure collection and for the safety of collection staff, please follow the set-out instructions:

Curbside collection

Undamaged single piece and two-piece toilets separated into two pieces can be collected at the curb.

Cracked or broken toilets will not be collected at the curb and should instead be brought to an EnviroDepot to be recycled for no charge.

london.ca/garbage

Recycling your toilet

Toilets dropped off to the Oxford Street and Clarke Road South EnviroDepots will be recycled free of charge.

Remove all non-ceramic parts such as a plastic toilet seat, insulation inside the toilet tank, and plumbing parts ahead of drop off so that the toilet can be recycled.
