HELPING YOU MAKE GREENER CHOICES

JULY/AUGUST 2023

Our climate is changing.

In London, the Climate Emergency Action Plan is helping lead our community response to these changes.

The plan has 200 actions listed of which 70% have been initiated, but important work is still needed and action is required by everyone.

Learn more about London's progress taking climate action and what actions you can take.

View the 2022 progress report at getinvolved.london.ca/climate

Avoid basement flooding and help keep your home dry

As weather gets warmer, wetter and wilder each year, making homes and communities more resilient must go hand-in-hand with reducing greenhouse gas emissions.

Prepare ahead of severe weather and consider how water drains around your home.

- Maintain lot grading away from your home's foundation
- Check that flood preventative devices such as your sump pump and backwater valve are working
- Direct downspouts away towards a grassy area or garden

Learning about climate action and other green programs through CityGreen

The CityGreen booth has been active this summer at several major festivals and events. Thank you for visiting us!

For those that missed the CityGreen booth, our educational information and resources can be found online as well at getinvolved.london.ca/citygreen

Park your bike securely in a bike locker

Riding your bike instead of driving a vehicle when possible is a great way to take climate action. It's fun too!

Use the free Movatic smartphone App to reserve a bike locker and park your bike.

Or try a monthly rental this summer. A bike locker can be rented for just \$20/month!

Rent a locker any time with the **Movatic App**.
