HELPING YOU MAKE GREENER CHOICES

NOVEMBER/DECEMBER 2022

Clean Home Heating Initiative

The Government of Ontario recently announced the Clean Home Heating Initiative in collaboration with Enbridge Gas. Qualified households in London may receive incentives of approximately \$3,000 to \$4,500 for installing an air-source heat pump unit with smart controls. These improvements can help our environment and reduce energy costs.

Climate action at home

Single-family housing is the second-largest source of greenhouse gas emissions in London. Renovating existing homes with energy-saving improvements can have a big impact and is a priority in London's Climate Emergency Action Plan.

Help your home be more resilient to climate change.

Join us for new events across London!

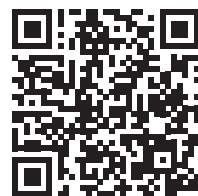

Green in the City is organized by the City of London, London Public Library, and London Environmental Network.

Green in the City is back this winter with free events about our environment and climate change. Meet neighbours, learn about local environmental initiatives, and connect with other people interested in a more sustainable community!

Stay safe around Stormwater Management Ponds

Stormwater management ponds gather and temporarily hold the water from rainfall and snow melt. They help prevent erosion, control flooding, and improve water quality in nearby rivers and creeks.

With unpredictable ice thickness and a continuous flow of water, stormwater ponds are unsafe for skating or tobogganing.
