Construction Update Notice: Ridout Street Road Rehabilitation & Cycling Improvements

Date: January 9, 2026

To: Business owner, resident and/or property owner

In the spring of 2026, the City of London will resume construction to complete the remaining work for the Ridout Street Road Rehabilitation and Cycling Improvements project in your area.

This project was initiated to rehabilitate the roadway and deliver protected cycling connections to help close the gap between Victoria Bridge and downtown.

Major roadway works are already complete, including the replacement of surface asphalt and new signage. The remaining work is localized and includes minor sidewalk replacement, installation of the protected bike lanes, and application of final pavement markings.

Construction was originally anticipated to be completed in the fall of 2025. Due to unforeseen circumstances, the remaining items are being completed in spring 2026. This notice summarizes the remaining scope, anticipated timing, and what to expect during construction.

Project location:

The map below shows the approximate location of the work area along Ridout Street, between Horton Street and King Street.

Anticipated project timeline:

Construction is expected to begin and be completed in early spring 2026.

Proposed work details:

Work to be completed as part of these projects includes:

- Replacement of damaged sidewalks.
- Adding concrete medians (northbound and southbound) in select areas to separate traffic from bike lanes.
- Building a new shared transit stop with a concrete curb.
- Installing durable pavement markings and flexible posts for protected bike lanes.

Please refer to Appendix A for more information on the construction impacts coming to your area and what to expect.

Transportation impacts:

Accessibility

A safe and accessible path of travel will be provided for all pedestrians through or around the construction site. If you require special accommodation (level entry, advanced notice, etc.) or have any questions about accessibility around the construction area, please contact the City Project Manager at any time during construction.

Pedestrians

Sidewalk closures and restrictions will be necessary during construction. Safe, accessible pedestrian paths will be provided to the extent possible on at least one side of the road. Signage will be installed to help guide people walking around the temporary sidewalk restrictions.

Motorists

To complete the work as efficiently as possible, lane reductions will be in place during construction.

Motorists can expect delays and are encouraged to use alternate routes where possible. Access will be maintained for residences and businesses, which remain open during construction. People driving are encouraged to use navigation apps such as [Waze](#) or [Google Maps](#) to find alternative routes during construction.

Cyclists

Cyclists are encouraged to use nearby streets to reach their destinations in the area and follow detour signs to navigate safely around the construction site.

Transit users

Some London Transit (LTC) bus routes and stops may be impacted during construction. Transit users are advised to visit the [LTC website](#) (londontransit.ca) for the most up-to-date information.

Other nearby work

This is another busy construction season in London, and with multiple projects taking place across the city, there is no better time to check if your commute will be impacted. To learn more about other local projects in your area, please visit london.ca/construction. You may also use the interactive map on london.ca/roadwork to find information about other current roadwork.

Contact information:

The city is committed to keeping you connected and informed during construction. Please reach out to your City Project Manager at any time during construction.

Councillor David Ferreira (Ward 13)

Appendix A: Construction impacts & temporary conditions

Dust, noise and vibrations

You may experience dust, noise, service interruptions and other inconveniences during construction. Construction equipment can also cause vibrations. Please ensure you protect any valuables susceptible to damage.

Work Hours

Work will typically take place from 7:00 am to 6:00 pm Monday to Friday, with work after hours and on weekends as required to accommodate the completion of the project within the established schedule and to minimize the impacts of the work.

Street access and parking

Street and driveway access will be maintained to the extent possible. When necessary, parking on adjacent streets beyond posted time limits may be allowed. Please contact the City Project Manager for more information or if you require special access (e.g., paratransit, commercial deliveries, etc.) while this work is underway.
